

I like the little moments
like laying on the ground and
looking up at the sky
looking at the stars
You like danger

Danger, Adrenaline, excitement, energy
They are why I live
Energy when I wake up and think about my day
Live hard, die old

Days spent resting are filled with thoughts
Old mistakes constantly examined

Thoughts, dreams, problems, solutions

Examine then action, to war

Solutions to this are none, Kill or die

war I am designed for

die if my thoughts consume me

For I am a madman

Me, I smile at danger

Madman I chose and was given

Danger is to others what is exciting to me

Given a little moment, I am lost in memories

Me? Me - oh my craziness is fun

Memories remember madmen

Fun is created by them

Madmen are few

Them. The others. The comfortable, are many

Few are necessary

Many are not

Necessary to moving a species forward

Not by luck, but by toil

Forward we march

Toil tirelessly until we finally rest

March on Madman

Hard lie the path ahead.
