

Long line, restless people
wasted hours, pained smiles
crossed arms, shifting feet
as we all hurry up and wait

Appointments late, crying babies

Few staff, many clients

Low AC, Ticking clock

Finite lives and pressing timelines make some balk

Outdated Government, issuing permits

irresponsible development, necessitates cars

Lives taken

, communities broken

Because the money has many people roped in

Inflation growing, expenses up

media brewed, culture skewed

desperation flowing, raise repeat

So in that way goes the tide, despite many who've tried
