

Connection

A spark of electricity, shocking
ice melting, a river flowing to the sea

It may be silent or sing to the sky

and it has a workman way of making the world go round

connection

creates life and prevents strife
a sort of salve to the sorrows of now

Many search, seeking safety or stories

others find it in art, nature, or self and have no worries

connection

is eyes meeting and smiles shared

it is trusting others and giving your heart

it fills your body like sun on your back, or swimming in
and necessitates presence and an ability to be

connection

is the medium through which all things flow
Electricity, love, temperature, joy, energy in all forms

You see, connection is the 'Key'

That creates memories out of your dreams
