

Feet in the grass, sun on my back
Birds chirping, clouds gliding

In another world
Machines whirring, Data Flowing
Things created with no human

Thoughts of Future

Kids I want, relationships I value
Money I'll need To feed these dreams

Fear exist in me
Wicked and wild, Scarce and stressed
I take a breath, and know things will flow

Back to gratitude
The girl I have, the friends I keep
The health I hold, Forward I want to leap

A search for meaning
In a horizon unknown, timelines controversial
exponential misunderstood, what do I do?
